What are the key risks that are specific to the Issuer?

Risks related to the Issuer's financial situation: Risk that HVB Group will not be able to meet its payment obligations on time or in full or to obtain sufficient liquidity when required as well as that liquidity will only be available at higher interest rates, and the risk that the bank will only be able to liquidate assets on the market at a discount could create liquidity problems for HVB Group and thus could result in a limited ability to fund its activities and meet its minimum liquidity requirements.

Risks related to the Issuer's specific business activities: Risks arising from the normal business activities of HVB Group, which involve credit risk in the lending business, market risk in the trading business as well as risks from other business activities such as the real estate business activities of HVB Group could have an adverse impact on HVB Group's operating results, its assets and its financial situation.

General risks related to the Issuer's business operations: Risks from inadequate or failed internal processes, people and systems or from external events, risks caused by adverse reactions of stakeholders due to their altered perception of the bank, risks from unexpected adverse changes in the future earnings of the bank as well as risks from concentrations of risk and/or earnings positions could result in financial losses, a downgrade of HVB's rating and an increase in the business risk of the HVB Group.

Legal and regulatory risk: Changes of the regulatory and statutory environment of HVB could result in higher capital costs and a rise of costs for the implementation of regulatory requirements. In cases of non-compliance with regulatory requirements, (tax) laws, regulations, statutory provisions, agreements, mandatory practices and ethical standards, the public perception of HVB Group as well as its earnings and financial situation could be negatively affected.

Strategic and macroeconomic risk: Risks resulting from management either not recognising early enough or not correctly assessing significant developments or trends in the bank's environment and risks arising from negative economic developments in Germany and on the international financial and capital markets could have a negative effect on the assets, liabilities, financial position and profit or loss of HVB Group. In particular, the geopolitical tensions, rising protectionism, less dynamic growth in China and a slowdown in the German real estate market could lead to a more severe slowdown in the German economy. In addition, if any of the aforementioned risks materialises, turbulence could occur on financial and capital markets.

Section 3 – Key information on the Securities

What are the main features of the Securities?

Product Type, Underlying and form of the Securities

Product Type: Express Securities (with Physical Delivery) (Non-Quanto Securities)

Underlying: Ferrari N.V. (ISIN: NL0011585146 / Reference Price: Prezzo di Riferimento)

The Securities are issued as bearer bonds within the meaning of § 793 German Civil Code (*Bürgerliches Gesetzbuch*). The Securities will be represented by a global note and are freely transferable. The international securities identification number (ISIN) of the Securities is set out in Section 1.

Issuance and Term

The Securities will be issued on 1 April 2025 in Euro (EUR) (the "**Specified Currency**") as up to 30,000 Certificates. The Securities have a defined term.

General

The value of the Securities during their term depends mainly on the price of the Underlying. In principle, the value of the Securities rises if the price of the Underlying rises and falls if the price of the Underlying falls.

Interest

The Securities do not bear interest.

Redemption

Automatic Early Redemption

Provided that no Call Event has occurred, the Securities allow for an automatic early redemption at the respective Early Redemption Amount (k) on the respective Early Payment Date (k), if an Early Redemption Event (k) has occurred.

An Early Redemption Event (k) occurs, if R (k) on an Early Redemption Observation Date (k) is equal to or greater than the Early Redemption Level (k).

Early Redemption Level (k) means the product of the Early Redemption Factor (k) and R (initial).

R (k) means the Reference Price of the Underlying on the respective Early Redemption Observation Date (k).

Early Redemption Observation Date (k):	25 March 2026 (1), 23 March 2027 (2), 27 March 2028 (3), 23 March 2029 (4)
Early Redemption Factor (k):	100% (1), 100% (2), 100% (3), 100% (4)
Early Redemption Amount (k):	EUR 1,060.00 (1), EUR 1,120.00 (2), EUR 1,180.00 (3), EUR 1,240.00 (4)
Early Payment Date (k):	1 April 2026 (1), 1 April 2027 (2), 3 April 2028 (3), 3 April 2029 (4)

Redemption as at the Final Payment Date

Provided that no Call Event and no Early Redemption Event (k) has occurred, the Securities will be redeemed on the Final Payment Date by payment of the Redemption Amount as follows:

- If no Barrier Event has occurred, the Redemption Amount corresponds to the Maximum Amount.
- If a Barrier Event has occurred and R (final) is equal to or greater than the Strike the Redemption Amount corresponds to the Calculation Amount.
- If a Barrier Event has occurred and R (final) is lower than the Strike, the Securities will be redeemed by delivery of the Underlying in a quantity expressed by the Ratio per Security. If the Ratio leads to a non-deliverable fraction of the Underlying, a cash amount expressed in the Specified Currency is paid in the amount corresponding to the value of the non-deliverable fraction of the Underlying.

Additional definitions and product terms

Barrier means the product of the Barrier Level and R (initial).

A Barrier Event occurs if R (final) is lower than the Barrier on the Final Observation Date.

R (final) means the Reference Price of the Underlying on the Final Observation Date.

R (initial) means the Reference Price of the Underlying on the Initial Observation Date.

Ratio means the quotient of the Calculation Amount divided by the Strike.

Strike means the product of the Strike Level and R (initial).

Barrier Level:	70%
Calculation Amount:	EUR 1,000.00
Final Observation Date:	25 March 2030
Final Payment Date:	1 April 2030
Initial Observation Date:	28 March 2025
Maximum Amount:	EUR 1,300.00
Strike Level:	100%

Extraordinary termination right: Upon the occurrence of one or more call events (for example, if price quotation of the Underlying on the Relevant Exchange is suspended indefinitely or permanently discontinued and no Replacement Exchange is available or could be determined) (the "**Call Event**") the Issuer may call the Securities extraordinarily and redeem the Securities at their Cancellation Amount. The "**Cancellation Amount**" is their fair market value.

Adjustments to the Terms and Conditions: The Calculation Agent may adjust the Terms and Conditions of the Securities if an adjustment event (for example, each measure taken by the company that has issued the Underlying or by a third party which, as a result of a change in the legal and financial position, affects the Underlying) (the "**Adjustment Event**") occurs.

Status of the Securities: The Securities constitute direct, unconditional and unsecured obligations of the Issuer. The Securities rank *pari passu* with all other unsecured and unsubordinated present and future obligations of the Issuer. Exception: obligations which have a preference or subordination under the law.

Where will the Securities be traded?

Admission to trading: No application for the Securities to be admitted to trading on a regulated market has been made.

Listing: Application to trading will be made with effect from 1 April 2025 on the following multilateral trading facilities (MTF): Freiverkehr der Börse Stuttgart (*Regulated Unofficial Market of the Stuttgart Stock Exchange*)

What are the key risks that are specific to the Securities?

Credit risk of the Issuer and risks in relation to resolution measures in relation to the Issuer: The Securities constitute unsecured obligations of the Issuer vis-a-vis the Security Holders. Any person who purchases the Securities therefore relies on the creditworthiness of the Issuer and has, in relation to his/her position under the Securities, no rights or claims against any other person. Security Holders are subject to the risk of a partial or total failure of the Issuer to fulfil obligations which the Issuer is liable to perform under the Securities in whole or in part, for example, in the event of the Issuer's insolvency. The worse the creditworthiness of the Issuer is the higher is the risk of a loss. In the case of realization of the credit risk of the Issuer the Security Holder may sustain a total loss of his/her capital, even if the Securities provide for a Minimum Amount at their maturity. Moreover, Security Holders may become subject to resolution measures in relation to the Issuer if the Issuer is failing or likely to fail. The obligations of the Issuer under the Securities are not secured, guaranteed by third parties or protected by any deposit protection or compensation scheme.

Risks related to market value-influencing factors: The Security Holders bear the risk that the market price of the Securities may be subject to severe fluctuations during the term of Securities and that the Security Holder is not able to sell the Securities at a specific time or for a specific price. The market value of the Securities will be affected by a number of factors. These are inter alia the creditworthiness of the Issuer, the relevant prevailing interest and yield rates, the market for similar securities, the general economic, political and cyclical conditions, the tradability and, if applicable, the remaining term of the Securities as well as additional Underlying-related market value-influencing factors. The market value of the Securities as well as the amounts distributable under the Securities primarily depend on the price of the Underlying.

Risks related to the Redemption Amount: The Redemption Amount may be less than the Issue Price or the purchase price. This means, the Security Holder only achieves a return if the Redemption Amount exceeds the individual purchase price of the Security Holder. A participation in a favourable performance of the Underlying beyond the Maximum Amount is excluded. The risk of price losses of the Underlying does not end with its delivery but only with its sale by the Security Holder. There is no automatic sale of the delivered quantity of the Underlying. **A total loss is possible.** If the currency of the country where you purchase this product or the account to which payments on the product are credited differs from the currency of the product, be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies.

Risks related to a Barrier Event: If a Barrier Event occurs, a more advantageous pay-out formula will be disappplied. In any case the Security Holder may lose his invested capital in total or in part.

Risks arising from missing ongoing payments: The Securities do not bear interest or grant any other conditional or unconditional rights for ongoing payments which could compensate possible losses of principal.

Risks related to an Automatic Early Redemption: If an Early Redemption Event occurs, the Security Holder will neither participate in any future favourable performance of the Underlying nor be entitled to further payments under the Securities after an early redemption. In addition, the Security Holders are exposed to the risk that they may only reinvest the principal received due to an early repayment of the Securities to less favourable conditions.

Risks related to shares: The Securities are associated with similar risks for the Security Holders as in case of a direct investment in the shares specified as Underlying. The price of a share can fall sharply or it can become worthless, e.g. due to the insolvency of the issuer of the share.

Risks related to potential conflicts of interests: Conflicts of interest in relation to the relevant Issuer or the persons entrusted with the offer may arise, which may result in a decision to the Security Holder's disadvantage.
